

Best Star Tech-only setup under ₳20k (real vertical)

✅ Package A: “Big main + true vertical side” (recommended)

Main (big, landscape): Gigasonic GS-21.5 21.5" FHD monitor — ₳6,700.

Link:

<https://www.startech.com.bd/gigasonic-gs-21-5-monitor>

Vertical monitor (portrait): HKC MB20S1 19.5" HD+ with 100×100 VESA — ₳8,000.

Link:

<https://www.startech.com.bd/hkc-mb20s1-monitor>

Monitor arm (for portrait rotation): Kaloc KLC-DS200 (VESA, tilt + swivel) — ₳2,300.

Link:

<https://www.startech.com.bd/kaloc-klc-ds200-adjustable-single-monitor-arm%3Fsrsltid%3DAfmBOoqeqxHuiYYqvTF2RFKGjs1AxycoX4IUn7ISqHj2jevgWI6EzyF>

USB-C → HDMI (2nd monitor connection): UGREEN US320 adapter — ₳1,590.

Link:

<https://www.startech.com.bd/ugreen-us320-type-c-to-hdmi-adapter>

Cost (checked)

6,700 + 8,000 + 2,300 + 1,590 = ₳18,590 ✅ under 20k

Why this works for Backend/DevOps

- Main screen: IDE + docs
 - Portrait screen: logs/terminal/docker/k8s output (portrait is *perfect* for scrolling)
-

Connection layout (simple)

- Laptop **HDMI** → Main monitor HDMI
- Laptop **USB-C** → UGREEN adapter → Vertical monitor HDMI
- Put the HKC on the arm and rotate to portrait.
